nishant23355@iiitd.ac.in | [+91-8920870210](tel:+91-8920870210) | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [LeetCode](#)

Education

Indraprastha Institute of Information Technology, Delhi (IIIT-D)

B.Tech in Computer Science & Applied Mathematics (CSAM)

2023 – 2027

CGPA: 7.50

Technical Skills

Expertise: Full-Stack & Backend Development, Machine Learning, NLP, Scalable Systems, REST APIs, System Design, Data Structures & Algorithms, OOP, DBMS

Languages: Python, Java, C++, TypeScript, JavaScript, SQL, Swift

Web & Databases: React, Next.js, Node.js, Express.js, PostgreSQL, Supabase, Firebase, Tailwind CSS, TanStack Query

ML & Tools: PyTorch, TensorFlow, OpenAI Whisper, LightGBM, Gemma + LoRA, Optuna, Docker, Git, FastAPI, CUDA, Vercel Serverless

Experience

Software Engineering Intern (Full-Stack & AI Systems)

Mar 2026 – Jun 2026

Chiacon Consulting India Pvt. Ltd.

[Live](#) | [GitHub](#)

- Built a corporate web platform in **Next.js 16** and **TypeScript**, tuning it to **90+** Lighthouse scores across all metrics.
- Developed secure API routes with **Zod** validation and **Cloudflare Turnstile** bot protection, plus an HR backend with strict JSON-schema parsing that cut manual screening effort by **~40%**.
- Shipped **27+** pages with a Notion-backed CMS blog, Redis rate-limiting, and interactive WebGL/Spline visuals, deployed on **Vercel** with dark/light theming.

AI Clinical Scribe: Multi-modal Speech & NLP Pipeline

Jan 2026 – May 2026

IIIT-Delhi | B-Tech Project (Research)

- Built a real-time multi-modal pipeline (**Whisper** ASR + **Pyannote** diarization) converting clinical conversations into structured SOAP notes, with **100% keyword coverage** and **zero drug hallucinations**.
- Implemented an automated **ICD-10** coding module using NLP named-entity recognition for standardised diagnostic coding, cutting physician documentation load by an estimated **~30–40%**.
- Added an audio-preprocessing front-end (noise reduction, multi-speaker separation) and an evaluation harness scoring the pipeline on **Word Error Rate**, SOAP completeness, and ICD-10 accuracy.

Software Engineer Intern (iOS & Backend Systems)

Jan 2025 – Jun 2025

ModularityLabs

[GitHub](#)

- Led development of a reactive iOS productivity app in **SwiftUI** and **Combine**, adding offline-first support and improving state synchronisation across sessions and devices.
- Integrated **Firebase Auth** and **Firestore** data pipelines for real-time consistency across concurrent users, cutting user-operation latency by **~20–30%** and improving responsiveness.
- Structured the app on an **MVVM** architecture with **Core Data** (NSPersistentContainer) persistence for reliable offline use and clean separation of concerns.

Projects

Hybrid Movie Recommendation System

Jan 2025 – Apr 2025

Python, PyTorch, LightGBM, Gemma + LoRA, Optuna, Gradio

[GitHub](#) | [Demo](#)

- Built a 3-stage hybrid pipeline benchmarking 7 collaborative-filtering models (SASRec, LightGCN, BPR, EASE, NeuMF, DCN, ItemKNN) on MovieLens-1M, achieving **HR@10 = 0.797**.
- Fine-tuned a **Gemma LLM** (LoRA) for semantic scores feeding a **LightGBM LambdaRank** meta-learner (Optuna HPO), reaching **NDCG@10 = 0.636**, **0.99** personalisation, and **78%** catalog coverage.

AgriLink: Full-Stack Agricultural Marketplace

Jul 2025 – Aug 2025

React, Node.js, Express, PostgreSQL, Supabase (JWT), TanStack Query

[GitHub](#)

- Developed a secure full-stack marketplace for direct farmer-to-buyer transactions, cutting out supply-chain intermediaries.
- Designed a real-time analytics dashboard and a normalised **PostgreSQL** schema, exposed through a validated, rate-limited **REST API** with **JWT** role-based access across buyer and farmer portals.

Achievements

- **Competitive Programming:** **500+** DSA problems solved, peak **1900+** LeetCode rating (Knight tier); HackerRank **5-Star** (×3).
- **GPU Programming Specialisation** (JHU, Coursera): CUDA parallel computing, cuDNN, and GPU performance tuning.
- **Certifications:** Google Database Professional (Coursera) and LearnQuest AI for Scientific Research Specialisation.
- Taught **100+** students AI fundamentals (Python, ML, neural networks) at IIIT-Delhi's AI Summer Camp.
